

SCHEDULE OF ASSESSMENT PROGRAMS & FEES – Funded Forex

Application of Terms and Conditions

The provisions of this Schedule are subject to, and form part of, the Terms and Conditions – Technology Access and Trader Assessment Program (Terms) as provided and agreed to by you on establishment of your Account. Unless expressly stated otherwise, the provisions of this Schedule prevail in the event of any discrepancy between them and the Terms.

Available Assessment Programs

Type of Challenge	Cost	Evaluation & Verification	Funded Stage	Potential Payment						
Elite \$5,000 Simulated Capital	\$69	Starting Balance: \$5,000 simulated capital Assessment Period: 105 days (see below)	Starting Balance: \$5,000 simulated capital	1st, 2nd and 3rd payout are capped at 6% of the Starting Balance of the account. 6% = \$300 4th payout and future payouts have no profit cap. Profit Split						
		1st Assessment: Evaluation Stage			Funded Stage					
		Assessment period:	5 min trading days to 35 calendar days		Assessment period:	Unlimited				
		Profit Target: \$500	10% trading profit on Starting Balance		Profit Target:	None				
		2nd Assessment: Verification Stage			Clients must comply with our inactivity rule: if an account has no trading activity during 30 consecutive calendar days the account will be breached.					
		Assessment period:	5 min trading days to 70 calendar days		Even though there is no Profit Target the minimum amount for a payout is \$25					
		Profit Target: \$250	5% trading profit on Starting Balance		For an eligible Refund on the first payout, the payout must be at least worth the cost of the challenge with no discounts: \$69					
		Note: All trading during the Assessment

Profit Target:	None
----------------	------

Clients must comply with our inactivity rule: if an account has no trading activity during 30 consecutive calendar days the account will be breached.

Even though there is no Profit Target the minimum amount for a payout is \$25

For an eligible Refund on the first payout, the payout must be at least worth the cost of the challenge with no discounts: \$69

For a Payout to be approved it must comply with our profit consistency rule.

If the account is breached, the client must start from the beginning with capped payouts.

Payouts are processed 5-7 business days

Refunds are processed 15 business days

If your account is traded while a payout is being processed, the account will be breached, if the payout is approved it will be paid out.

Additional Notes:

1. All dollar amounts above are in [US Dollars].
2. The following countries are restricted from Funded Forex: Afghanistan, Botswana, Congo, Crimea, Cuba, Democratic Republic of Congo (DPRK) ,Republic of the Congo, Ethiopia, Iran, Iraq, Japan, Libya, Myanmar (Burma), North Korea, Pakistan, Russian Federation, Spain, Somalia, Sudan, Syria, Trinidad and Tobago, Tunisia, Yemen, Zimbabwe. If your country does not appear above, you are welcome to sign up with us.
3. All of the initial balance of our accounts is simulated capital and/or virtual capital. Instant Funding accounts provide leveraged capital accounts based on the cost of the challenge which is deposited to a margin account with our Liquidity Providers.
4. Once you have successfully completed the challenge phases or would like to deposit money into your brokerage account, you will receive a notification on your dashboard prompting you to initiate the KYC verification process.
5. We do not have a traditional Scaling plan where you acquire more virtual simulated capital if you reach milestones. At Funded Forex we believe in giving real traders real capital if they demonstrate consistency with their trading style and risk management. We use our platform to leverage trading data and analyze who deserves a shot at bigger opportunities in their trading career. These private offerings are made individually to traders that meet our risk/reward appetite after they have successfully completed a 90-day funded period with us, several payouts and an interview process with our Risk Team.
6. You are not allowed to merge your accounts. Neither trade the same trading strategy in multiple accounts from the same user/kyc. What we do offer is a Max Allocation of \$600,000 per user. You can reach this Max Allocation by acquiring as many challenges as you want until you reach this amount, please take in consideration that each challenge should have its own trades. If you have the only 1 trading strategy and you have multiple accounts, you should diversify your trades between your accounts, but never copy trades or manually input trades (with a short price/time variance) into more than 1 account simultaneously. You can have a mix of Challenges in your Max Allocation, either different Initial Balance accounts from the same challenge, or different types of challenges, you are free to choose. Each account must be traded independently. You are not allowed to copy trades in between them. The only copy trading that we allow is from outside Funded Forex to one of your accounts or vice versa as long as the accounts involved are under the same KYC.

7. Your trading cycle kicks off with your first trade, not when your account gets activated or credentials get sent. The moment you enter your first trade is when we consider your trading cycle initiated.

8. Any account that has 30 calendar days or more of inactivity, will be breached.

9. Max Daily Loss is based on the initial account balance. We will use a \$100,000 Elite Challenge (8% Max Daily Loss) account for this example:

Initial Balance: \$100,000

Daily Loss: 8% = \$8,000

Starting point for this is the start of the day according to our Server/Platform. Max Daily Loss parameters reset every time our Server initiates a new day.

1. Trader starts the day with a \$100,000 balance, once the equity of the account reaches \$92,000, rule would be breached and challenge would be failed.

2. Trader starts the day with \$100,000 balance, if during the same day the trader grows the account to a \$110,000 balance (meaning a \$10,000 profit has been acquired), the lowest equity the account can reach is still \$92,000.

In this example the profit acquired during the day is useful as a buffer only for the current day allowing the trader to lose up to \$18,000 from its highest balance point.

3. Trader starts the day with a \$110,000 balance, the max daily loss for the day is still \$8,000 since it's 8% of the initial account balance. If the account reaches a \$102,000 equity the rule would be breached and challenge would be failed.

4. Trader starts the day with a \$98,000 balance, the max daily loss for the day is still \$8,000 since it's 8% of the initial account balance. If the account reaches a \$90,000 equity the rule would be breached and challenge would be failed.

5. Trader starts the day with a \$150,000 balance, the max daily loss for the day is still \$8,000 since it's 8% of the initial account balance. If the account reaches a \$142,000 equity the rule would be breached and challenge would be failed.

On this same day the trader may go down to \$143,000 without losing the account. The next day the trader starts with a \$143,000 balance and may go down to \$136,000 without losing the account since \$8,000 has not been lost. A \$135,000 equity would breach the rule.

The next day the trader starts with a \$136,000 balance, it may go to \$129,000 without losing the account since \$8,000 has not been lost. This can go on day per day until the account reaches Max Overall Loss of \$89,000 (11% of the initial balance account = -\$11,000) and then the Max Overall rule would be breached and challenge would be failed.

10. Max Overall Loss is based on the initial account balance. We will use a \$100,000 Elite Challenge (11% Max Overall Loss) account for this example:

Initial Balance: \$100,000

Overall Loss: 11% = \$11,000

If the trader reaches a \$89,000 equity or balance, the rule would be breached and challenge would be failed.

11. Once you achieve your first payout you will receive your Subscription Fee back as a refund. The following condition must be met in order to receive your refund: Requested Payout should at least be worth the same amount as the full original price of your challenge. (No discounts applied)

12. Funded Forex only offers Profit Share from the Funded Stage in all of our Challenges.
13. Please do not try to pair your account with Myfxbook by using your master password since this is against our rules, you can only do it by using the EA. Also if the trader is given an investor password of his account and the password is changed, this will automatically breach the account if its a Prop Firm Account.
14. Traders are only allowed to copy trades from or to external accounts that are under the same KYC as the one in Funded Forex, copy trading between Funded Forex accounts of the same KYC or different users is prohibited.
15. Pass your challenge services, account management and account sharing is prohibited in all stages.
16. Any gambling behavior such as one sided betting, rolling accounts, full margin, all or nothing, over leverage, over exposure is prohibited in all stages.
17. Tick scalping, latency trading, arbitrage trading, account hedging, high frequency trading, EA trading with the same parameters or setfile as other users is prohibited.
18. Group trading where multiple users have similar entry, exit, pair, lot size and trading behavior is prohibited.
19. Trading while a payout is being processed will breach the account, traders must wait until they receive an email confirmation that their payout has been successfully processed and a withdrawal transaction is reflected on the trading platform.
20. Our consistency rule is very simple, one trading day must not exceed more than 50% of the profits in your account. If you are requesting a \$10,000 payout or you are passing your evaluation and/or your verification stage, one trading day must not be worth more than \$5,000. This trading day can be formed of 1 trade or multiple trades. In case you have a trading day that is worth more than 50% of your total payout or profits of the step 0/evaluation or verification stage, you need to keep trading and make more profits per day in order to lower the percentage value of this trading day. Next table shows in which phases and challenge the consistency rule applies:

Challenge/Phase	<u>0 = Step 0</u>	<u>1 = Evaluation</u>	<u>2 = Verification</u>	<u>Funded</u>	
Elite		DOES NOT APPLY	APPLIES	APPLIES	
Unlimited		DOES NOT APPLY	APPLIES	APPLIES	
Instant Funding Conservative					DOES NOT APPLY
Instant Funding Aggressive					DOES NOT APPLY
Bolt Challenge		DOES NOT APPLY	APPLIES	APPLIES	APPLIES

Free Challenge	DOES NOT APPLY	APPLIES	APPLIES	APPLIES
----------------	-----------------------	---------	---------	---------

21. Trading days are taken in consideration only the days where a trade was opened, lasted for at least 30 seconds and the lot size is relevant/similar to the rest of trading days. If it's pretty obvious that you opened a 0.01 lot that lasted 31 seconds just to count it as a trading day it will not be valid, also take into consideration that this would not help you at all with our consistency rule. Trading days are monitored by our system, but if an account is flagged with suspicious trading activity, our risk team will evaluate if the trading day is valid or not.

22. We do not have a limited number of IPs. For internal and security reasons we recommend you to not have more than 3 IPs in your trading activity. This makes the account verification process easier when a payout is being requested. Instead of an IP rule, we do have a Max 3 Device rule in which traders are allowed to use up to 3 devices for their trading activities. Our trading platforms are able to record this info and log it into our database. We recommend only using your phone or personal computer, do not log in to your trading platform on a device you would rarely use that you don't own (friend, family, acquaintance). Changing devices once registered under a KYC is not allowed.

23. News trading is only allowed if you acquire the News Trading add-on. Pricing of the add-on can be verified at check-out when buying your challenge. In case you did not buy the add-on you are not allowed to trade 5 minutes before and/or 5 min after a RED FOLDER (High Impact news event). This includes both Market Execution and opening/closing Pending Orders (including take profit and stop loss). Please be aware that you're permitted to keep your ongoing trades active during news events. However, only high-impact news events that directly affect the trading pairs will be considered. If the news isn't directly related to your trading pair or is of low or medium impact (ORANGE or YELLOW folder), you're free to proceed with your trades. We use Forex Factory as a guideline for High impact events.

For stocks, trading "earnings" is not allowed. We don't allow traders to speculate on price fluctuation pre-market and after-market during earning report seasons of any company.
